Professional Summary

React.js Developer with **3 years of professional experience** building responsive and scalable web applications using **React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, React Query, Zustand, Axios, and REST APIs**. Experienced in delivering production-ready interfaces including dashboards, analytics screens, data tables, dynamic forms, filters, pagination, image management, and complex business workflows. Strong understanding of component-based architecture, state management, asynchronous JavaScript, API integration, form validation, performance optimization, lazy loading, code splitting, debugging, Git, code reviews, and production support.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Development: React.js, Next.js, React Router, Responsive Web Design, Component-Based Architecture

State Management: Redux, Redux Toolkit, RTK Query, React Query, Zustand

UI Frameworks and Libraries: Material UI, Ant Design, Shadcn UI, Bootstrap, Tailwind CSS

Forms and Validation: Formik, React Hook Form, Zod, Yup

API and Data Management: REST APIs, RESTful APIs, Axios, Fetch API, JSON, Third-Party API Integration, Asynchronous JavaScript

AI-Assisted Development: ChatGPT, Claude, GitHub Copilot, Windsurf, Codex, Antigravity

Development Tools: Git, GitHub, Vite, Postman, Chrome DevTools

Engineering Practices: Reusable Components, Custom Hooks, Component-Based Architecture, Responsive Design, Performance Optimization, Lazy Loading, Code Splitting, Error Handling, Debugging, Cross-Browser Compatibility

Professional Experience

Ditstek Innovations

2023 – Present

React.js Developer

Mohali, Punjab

- Develop and maintain production web applications using **React.js, TypeScript, JavaScript, HTML5, and CSS3**, applying component-based architecture and reusable design patterns.
- Engineer reusable React components for dashboards, forms, data tables, filters, modals, and business workflows, improving consistency and maintainability across application modules.
- Integrate **REST APIs** using Axios and Fetch API, handling asynchronous requests, response processing, loading states, validation, and application errors.
- Implement server-state workflows with **React Query**, including caching, refetching, query invalidation, synchronization, loading states, and error handling.
- Implement client-side state management with **Redux, Redux Toolkit, RTK Query, and Zustand** according to application requirements and workflow complexity.
- Develop responsive user interfaces using **Material UI, Ant Design, Shadcn UI, Bootstrap, and Tailwind CSS** for desktop, tablet, and mobile experiences.
- Build dynamic forms using **Formik, React Hook Form, Zod, and Yup**, implementing conditional fields, validation rules, API submission, and error feedback.
- Optimize React applications using **React.lazy, Suspense, React.memo, useMemo, useCallback, lazy loading, and code splitting** to improve rendering efficiency.
- Create custom React hooks and shared utilities to centralize reusable logic, reduce duplication, and improve maintainability.
- Develop data-driven functionality including search, filtering, sorting, pagination, drag-and-drop, date-based workflows, and image management.
- Diagnose and resolve production issues involving UI rendering, API communication, state management, asynchronous operations, CORS, form validation, and browser compatibility.
- Manage source control and collaborative development using **Git and GitHub**, including feature development, branching, code reviews, and release workflows.
- Collaborate with developers, QA engineers, designers, and stakeholders throughout development, testing, debugging, and production support.

Projects

VersantInsights – Business Monitoring Tool	2026 – Present
– Develop business monitoring and analytics interfaces using React.js, TypeScript, Shadcn UI, and Tailwind CSS with responsive and reusable UI patterns. – Build dashboard and analytics screens for presenting business metrics, performance indicators, and data insights. – Manage application state using Zustand for scalable client-side workflows and shared state. – Integrate REST endpoints using Axios and manage server-side data with React Query, including caching, refetching, synchronization, and error handling. – Develop validated forms using Zod, including form state management, validation feedback, and API submission. – Apply lazy loading, React.memo, useMemo, useCallback, and code splitting to optimize frontend rendering and application performance.	
DS Guide – Marketplace	2025 – 2026
– Develop marketplace functionality using React.js, JavaScript, HTML5, CSS3, and Ant Design, implementing responsive layouts and reusable UI patterns. – Develop application workflows, data tables, filters, and forms using Redux, React Router, and React Bootstrap. – Integrate REST endpoints using Axios, implementing asynchronous request handling, pagination, loading states, API responses, and error handling. – Implement data visualization and user experience functionality using Chart.js, Swiper, React-i18next, React Toastify, PropTypes, and custom React hooks.	
Harken – Real Estate Evaluation Platform	2023 – 2025
– Develop real estate evaluation interfaces using React.js, TypeScript, JavaScript, HTML5, and CSS3 for complex property evaluation workflows. – Engineer reusable components for property evaluation, dynamic forms, data tables, image management, filters, and business workflows. – Integrate internal and third-party REST APIs using Axios to retrieve, process, validate, and submit application data. – Implement server-state management for API workflows, including caching, refetching, synchronization, loading states, and error handling. – Develop dynamic data-entry workflows using Formik and Zod, including conditional fields, validation rules, and API-driven form submission. – Develop interactive maps, image upload and cropping, photo galleries, evaluation screens, filters, and data-driven interfaces. – Investigate and resolve issues involving API communication, CORS, state management, form validation, image processing, date handling, and responsive layouts.	

Education

Chandigarh University	2019 – 2022
<i>Master of Computer Applications (MCA)</i>	<i>Mohali, Punjab</i>
M.S College	2015 – 2019
<i>Bachelor of Science in Mathematics</i>	<i>Motihari, Bihar</i>
